WHAT’S NEW & ENHANCED IN MINDMANAGER 21

NEW Text Accelerators
Take your projects into the fast lane by adding resources and tags to your topics simply by typing ‘@’ or ‘#’ followed by the resource or tag name.

NEW Topic Info Style
Gain greater flexibility over the way your information is displayed, resulting in the perfect display for your use case. With a fresh new design, the new topic info style is more clear, concise, and customizable.

NEW Topic Info Cards
Viewing hidden topic info is fast and easy with new topic info cards. Hide supplemental information to keep your map free of clutter, while retaining quick access to everything. Drag and drop info from cards to topics and vice versa.

ENHANCED Usability & Productivity
Discover over 30 usability & productivity enhancements, such as resource color coding, simplified horizontal scrolling, customizable snap-to-grid, and much more.

ENHANCED Microsoft Word Import & Export
Experience our fully reimagined Word import & export tool. Rebuilt from the ground up to offer greater customization and usability, without the dependence on a native Word installation.

ENHANCED Map Roll Ups
Aggregate data from multiple sources. Map roll ups allow users to add single topics and complete topic structures from multiple maps, whether stored locally or in the cloud, into one master diagram.

NEW Places Import & Export
Import & export any supported file type, including Microsoft Word, Excel, and Project files and more to and from Places, such as OneDrive, Google Drive, and SharePoint.

NEW Object Shapes
We've added new industry-standard shapes to better represent any situation or concept needed to maximize the impact of your diagrams and flowcharts. Now available in MindManager Windows 21 are block arrows, chevrons, parallelograms, and trapezoids.

**NEW Powerful Flowchart Extensions**
Add a new dimension of readability to complex flowcharts with line jumps, including rounded, bridge, and gap jumps. Increase your impact with improved relationship connection capabilities.

**ENHANCED MindManager Go**
Take your maps on the go with our free mobile viewing application. Narrow in on key topics with powerful filter and search capabilities. Available on [App Store](https://apps.apple.com) and [Google Play](https://play.google.com).

**ENHANCED MindManager Snap**
Discover new personal and collaborative ways to capture, receive, and share content any time, from anywhere, through your desktop, Chrome browser or mobile device.

**REIMAGINED Slides & Presentations**
Take unprecedented control over your slides. Use diagramming capabilities on individual slides, add information from multiple maps, whether stored locally or in the cloud, and evolve your slide decks over time.
FEATURE & USABILITY ENHANCEMENTS IN MINDMANAGER 21 21.0.261

Snap to Grid
• The Grid Size now configurable in MindManager options. Default grid size is 10mm.
• Macro nudge topics by 2mm using the arrow keys or micro nudge topics by .2mm with keyboard shortcut CTRL+Shift+<arrow keys>

HTML5 Export – Clicking Topic Opens Link
• Open links in a HTML5 exported map by simply clicking on the topic. This feature can be enabled in MindManager Options>HTML5 Export.

Task Information
• New Keyboard shortcut CTRL+Shift+I to add task information to selected topics.
• Fill color for Resources -when adding resources to the map, it is now possible to assign a fill color.

Zoom enhancements
• When using the zoom function, the selected topic will stay in focus on the screen.
• Zoom with mouse. Zoom in and out of the map canvas by holding down the mouse right-click button and using the scroll wheel.

Scroll Enhancement
• Horizontally scroll the map canvass by holding down shift + mouse scroll wheel.

Filtering enhancement
• When removing a filter, the last selected topic will be centralized on the screen.

Bulk Paste to Topic Notes
• Notes copied to the clipboard can be pasted to multiple topics.

Relationship lines between topics and objects
• Relationships can now be added between topics and objects and between objects and objects.

Properties
• You may now edit property values in-line directly in the topic.
• List Properties – The order of list property values can now be changed.
RETIRE FEATURES & SYTEM REQUIREMENTS
CHANGES IN MINDMANAGER 21 21.0.261

Integrations

- Mindjet Files & Tasks
  - The Mindjet Files and Tasks integration has been removed from MindManager Windows 21.
  - Customer communications have been sent to Account Owners containing instructions on how to download files locally from the platform using previous versions of MindManager or by using the Mindjet Files Web Client.
- Microsoft Word add-in ‘Send to MindManager’
  - This add-in was retired due to the rebuild of the Microsoft Word Export and Import. The integrations no longer require Microsoft Word to be installed on the system.
- Export to Microsoft PowerPoint.
  - The Export to Microsoft PowerPoint feature has been retired.

System Requirements Changes

- Support for Windows 7 has been retired.
- Support for integrations with Microsoft Office 2010 and Microsoft Office 2013 has been retired.
- For the most up to date System Requirements, go to https://www.mindmanager.com/en/support/system-requirements/
RESOLVED ISSUES IN MINDMANAGER 21 21.0.261

HTML5 Export
Issue: When exporting to HTML5, the ‘Revision Number and Modification Date’ is different than what is displayed in the Map file in MindManager.
Resolution: Fixed.

Places – SharePoint
Issue: When opening files from SharePoint Places, some folders and files are occasionally displayed.
Resolution: Fixed.

SharePoint Linker
Issue: File not found error appears when opening links pointing to SharePoint files or folders with '#' character in the title.
Resolution: Fixed.

Image Export
Issue: When exporting to an Image from alternative views (i.e. Tag View, Icon View), the outputted image is too small to read.
Resolution: Fixed.

Printing
Issue: WMF and EMF images are cut off when printing.
Resolution: Fixed.

Ribbon / User Interface
Miscellaneous
Issue: Map scrolls right after adding and deleting topic. This was due to MindManager selecting the next floating topic based on internal order (Order of entry in the Map’s XML file).
Resolution: Fixed. The next closest topic to the deleted topic will now be selected and in view.
KNOWN ISSUES IN MINDMANAGER 21 21.0.261

Objects

**Issue:** Relationship connectors between Topics and Objects or between Objects and Objects are removed when the map is opened & saved in older versions of MindManager for Windows and Mac.

**Workaround:** None. Do not save the map in older versions of MM or make a copy of the original before editing in older versions.
